- Sanitary retail range 8

Complete fixing sets for free-standing toilets and bidets

Free-standing toilets

Bidets

BUILDING MATERIALS

- Concrete
- Solid sand-lime brick
- Natural stone with dense structure
- Solid block made from lightweight concrete
- Solid brick
- Timber - disgregard nylon plug.

CHARACTERISTICS

ADVANTAGES

- Complete fixing sets including brass screws which allow for quick and easy installation.
- The large flange prevents contact between the screw and ceramic to reduce the likelihood of damage during fixing.
- The WB5N's assembly bracket, with pre-drilled rows of holes, allows for adjustable installation in two directions.
- The WCN is also suitable for fixing ceramic shelves and mirrors, and can thus be used for a wide range of applications.

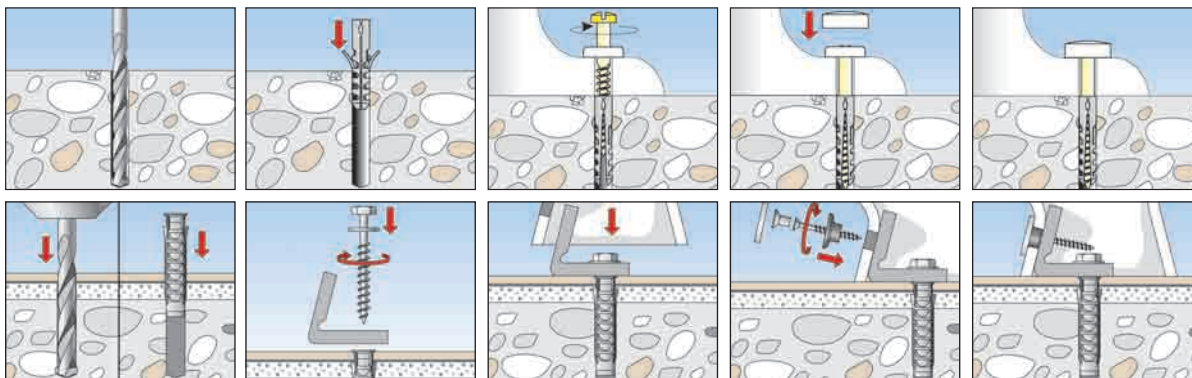

APPLICATIONS

- Free-standing toilets
- Bidets
- Ceramic shelves
- Mirrors
- Side fixing pans & semi-pedistals - use WB5N

FUNCTIONING

- S 8 RD is for push-through installation.
- WCN and S 8 D are suitable for both pre-positioned and push-through installation.
- The WB5N's assembly bracket is positioned using the slotted hole. The ceramics can then be fixed to the bracket via rows of holes. These allow for tolerances that may occur during the ceramic manufacturing process.

INSTALLATION

Complete fixing sets for wash basins, urinals and sanitary installations

WD

WST

Urinals

Wash basins

BUILDING MATERIALS

Fixing dependant, when using S-Plugs:

- Concrete
- Solid sand-lime brick
- Natural stone
- Solid block made from lightweight concrete
- Solid brick

CHARACTERISTICS

When using UX Plugs:

- Gypsum plasterboard and gypsum fibreboards
- Vertically perforated brick
- Hollow block made from lightweight concrete
- Cavity floor slabs made of brick, concrete, etc.
- Perforated sand-lime brick
- Natural stone
- Aerated concrete
- Chipboard
- Solid panel made from gypsum

ADVANTAGES

- Complete fixing sets for quick and easy installations.
- The UX universal plug can be used in all solid, hollow and board materials offering a high level of flexibility.
- Flanged nuts and collar sleeves made of high-strength nylon are resistant to ageing and chemicals and guarantees a long-lasting fixing that will not damage the ceramics.
- Cover caps* with a high-quality chrome finish ensure the fixture remains visually attractive for a long period of time. (*cover caps sold separately)

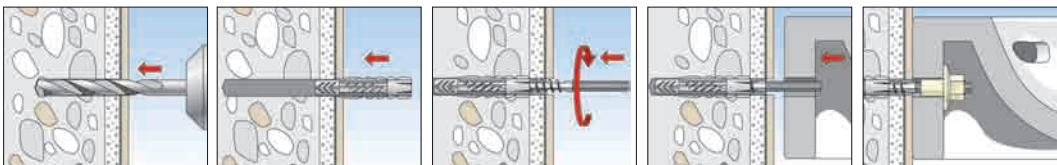

APPLICATIONS

- Wash basins
- Urinals
- Built-in toilets
- Boilers
- Gas heaters
- Cisterns

FUNCTIONING

- The UX plug without a rim is suitable for pre-positioned and push-through installations.
- Tightening the screw causes the UX to expand in the solid building material and to form a knot within the cavity.
- Maximum load-bearing capacity is only achieved when the screw is tightened so that the spanner flat lies on the plug rim.
- Tiles and plaster are not classed as load-bearing base materials.
- KM & WDP fixings sets are specially designed for fixing washstands and urinals to plumbing units and cavity walls

Complete fixing sets for wash basins and urinals in board building materials and plumbing walls

Urinals

Wash basins

BUILDING MATERIALS

- Gypsum plasterboard and gypsum fibreboards
- Chipboard

FUNCTIONING

- KM is suitable for push-through installation.
- When placed in the drill hole, the wide transition beam of the KM independently swings open behind the board.
- WDP is set into the plumbing walls during wall installation.
- Not suitable for fixing directly to plasterboard.

ADVANTAGES

- With their special geometries, KM and WDP are the specialists for fixings in plumbing and hollow walls.
- The wide cross beams of the KM and the large base plate of the WDP ensure a good load distribution, thus allowing for a high load-bearing capacity.

APPLICATIONS

- Wash basins
- Urinals

Technical disclaimer / Decisive factors

Due to the complexity of building materials, tools, fixing elements and installation techniques a comprehensive recommendation depends on full and detailed understanding of specific site conditions.

This document is a factual record of anchor performance obtained under specific conditions and does not constitute an endorsement of the suitability of the product for any specific application. This responsibility remains with the customer.

The data given shall be used as a guide for assessment or anchor suitability. Even when our advice is given in good faith it cannot be binding for this reason and we cannot accept any liability for any anchor failure due to the wrong design, misuse or wrong installation.

For safety critical applications only anchors with an ETA or Zulassung German Approval shall be used.
